Umar Farooq

Ruby on Rails Developer

As an experienced Associate Software Engineer with over a year of expertise in Ruby, Ruby on Rails, and various Ruby gems, I bring a versatile skill set to develop scalable and efficient web applications. With technical proficiency in Stimulus JS, Turbo, Hotwire, and integrating with Google APIs, RESTful APIs, and creating custom Rails APIs, I have proven my ability to build reliable and high-performance web solutions. My experience with web scraping using Nokogiri, Mechanize, HTTP, Open-URI, Faraday, and databases such as PostgreSQL, MySQL, and SQLite, along with HTML, CSS, JavaScript, and Bootstrap, has made me an adaptable developer with an eye for detail. My ability to collaborate with cross-functional teams, my knowledge of tools such as Postman, RubyMine, Visual Studio, Sublime, Jira, and Asana, and my proficiency in Git and GitHub make me an asset to any team.

Experience

Jan 2023

Upwork | Remote

Software Engineer

As a freelance software engineer on Upwork, I am continuously seeking new challenges and job opportunities. I am committed to providing excellent service to clients and am always open to discussing new projects and opportunities.

July 2022 - Dec 2023

Viral Square | Lahore, Pakistan

Ruby on Rails Developer

As a software engineer, I have had the opportunity to work on multiple web projects using various technologies including Ruby on Rails, HTML, CSS, Bootstrap, and JavaScript. These projects were for enterprise-level clients and I was responsible for providing ongoing support, bug fixes, and adding new features to the applications.

My role also involved developing both front-end pages and back-end APIs, as well as integrating third-party APIs into the projects. To streamline my work, I made use of various Ruby gems, including the Whenever gem for Rails job scheduling and Postman for API testing. Additionally, I used ngrok to test the web applications locally before pushing them to production.

Throughout my experience as a software engineer, I have gained a solid understanding of web development best practices and have honed my skills in Ruby on Rails and other relevant technologies. I am confident in my ability to deliver high-quality solutions that meet the needs of enterprise clients.

Jan 2022 - Jun 2023

Devsinc | Lahore, Pakistan

Software Engineer

Experienced software engineer with a focus on Ruby on Rails web app development and API integration. Worked on various projects, including the Weatherman project where I used Ruby to handle and manipulate large datasets, and developed proficiency in data manipulation and querying. Strong skills in Rails, Google APIs, third-party APIs, Stimulus, Turbo, web theme integration, and database management (MySQL, PostgreSQL, SQLite). Collaborated with other teams and developers on multiple projects.

Jan 2020 - Jan 2022

Fiverr | Remote Freelancing Platform

Fiverr Freelancer

Worked as software engineer freelancer on Fiverr for 2 years, providing web dev and web scraping services. Delivered high-quality solutions to clients from various industries. Gained an understanding of delivering results that exceed client expectations and demonstrated expertise in web dev and scraping. Valuable experience that helped me grow as a software engineer and develop skills in these areas.
